

PRESS RELEASE

Blockchain integration platform Unchain.io accelerates growth with funding of Value Creation Capital

Bilthoven/Amsterdam, March 12th, 2019 – The Security of Things Fund of Value Creation Capital in Bilthoven (The Netherlands) invests growth capital in Blockchain/DLT interoperability and integration platform Unchain.io.

Unchain.io offers DLT (distributed Ledger Technology) for integration of existing IT systems with new Blockchain applications. Mainly fast growing consortia and eco systems like IBM, Food Trust and R3 Corda can use the Unchain Blockchain Gateway to connect new participants seamlessly.

In a world that is digitalising at high speed, an efficient, fast and trustful exchange of information between organisations becomes increasingly relevant. The complex networks, in which these organisations collaborate, require a close integration of business processes and corresponding information flows and for which reliability, security and transparency is becoming increasingly important.

Unchain.io offers an integration platform that enables organisations to integrate their existing applications and devices with blockchain/DLT networks in a easy, cost effective and secure manner without the need to change these applications and therefore being less dependent of scarce blockchain/DLT experts. The Unchain platform is blockchain/DLT technology agnostic and one single version of the platform is able to integrate multiple applications of an organisation with multiple blockchain/DLT networks that can be based on different blockchain/DLT technologies. By lowering the barrier for organisations to join blockchain/DLT networks, the Unchain platform accelerates the adoption and success of these networks.

“Unchain.io has an extensive experience with the creation and implementation of blockchain/DLT technology in a wide range of companies and organisations and is involved in many global initiatives that want to leverage the value that the technology can bring to organisations”, says Arjeh van Oijen, CEO of Unchain.io. “With the investment from Value Creation Capital we are able to accelerate our growth on a national and international level. “Besides new funding, this investor also gives us a lot of strategic and practical support that is very valuable for us in the current stage of our company”.

“We are closely looking to blockchain/DLT technology for quite some time now and see an increasing number of serious applications of this technology with a lot of potential for a wide range of parties. Unchain.io has extensive expertise and experience of blockchain/DLT technology that it has leveraged this to build a platform that responds to a fast growing need in the market. In addition the team has a proven track record in servicing service complex clients and projects”, says Jos Bourgonje, Managing Partner with Value Creation Capital. “That combination offers us an attractive perspective in a market that we consider to offer an enormous potential for the coming years.”

Unchain.io

Unchain.io provides an integration platform that enables organisations to integrate their existing applications and devices with blockchain/DLT networks in a easy, cost effective and secure manner without the need to change these applications and being dependent of blockchain/DLT expertise.

The platform offers an intuitive user interface via which an organisation's own IT team or 3rd parties are able to configure, test and deploy integrations between applications (devices) and blockchain/DLT networks. Through a growing number of re-usable components, the amount of coding is kept to a minimum. Unchain.io has extensive experience with the execution of PoCs/pilots as well as development of production blockchain/DLT applications for customers in a wide variety of industries.

Value Creation Capital

Value Creation Capital (VCC) invests in companies that are active in high-tech (via TechNano Fund), Cyber Security (via Security of Things Fund), business software, data intelligence and IT managed services. VCC has been founded in 2005 by serial entrepreneurs who started, built and sold several interesting fast-growing ICT and Tech companies. VCC differentiates by combining "Intellectual Capital", sector experience & expertise and an extensive network with active value creation of their portfolio companies "to the next level".

Security of Things Fund

VCC started its Security of Things Fund in 2016 and has focus on young and fast-growing companies within the domain of Cyber Security. Security of Things Fund is the only investment fund in the Benelux that exclusively focuses on the relevant subject of Cyber Security that includes areas such as Secure Internet of Things (IoT), block chain technology, (forensic) data analysis and the protection of data and intellectual property.
